## **Project Title:** Graffiti in New York City

I want to create a dedicated webpage that explores the history of graffiti in New York City.

Growing up, I've always seen graffiti as an iconic symbol, capturing the city's unique history and energy. The main page would feature a brief description along with an image gallery showcasing notable graffiti pieces. Additional pages will provide more in depth content on the history of graffiti and various movements that have shaped its development in NYC. For navigation, I envision a simple, clear menu at the top of the page that remains sticky as users scroll.

- **Home page:** Provide a brief overview of graffiti and its significance
  - Along with image gallery of different pieces of famous works
- **Growth of graffiti culture in New York**
- **Decline of New York City graffiti subculture: enforcement and control**
- **Clean Train Movement era**
- **Graffiti in Media**
- **Sources/References:** List all sources used including image sources as well as the Wikipedia page
